## SUMMARY

Enthusiastic Full Stack developer with a relentless passion for transforming innovative ideas into robust, user-centric applications. Currently pursuing a degree in Software Engineering at Junia Isen, where I am honing my skills in front-end and back-end technologies. Leveraging a blend of creativity and technical acumen, I thrive on tackling complex challenges and delivering elegant solutions. I am Currently seeking Internships

## EDUCATION

Msc Software Engineering (Bac +5) 2023 - Present  
Junia ISEN Lille, France

Bsc Computer Science 2020 - 2023  
Kwame Nkrumah University of Science and Technology Kumasi, Ghana

## EXPERIENCE

Full Stack Developer Intern 11/2022 - 01/2023  
Ghana Police Service Accra, Ghana

- During my time at the Ghana Police Headquarters, I successfully designed an application called Police-Map.
- Police-Map is an interactive web application created using ReactJS, Leaflet, and Firebase to visualize the distribution of police stations in different cities.
- Police-Map has been in use from January 2023

Full Stack Developer Intern 03/2020 - 04/2021  
EV4AFRICA Kumasi, Ghana

- Developed a new feature for the company's Web application using agile methodology.
- I used responsive web application methods and tools like React, Redux, Node.js, Express and other technologies during my time at the company
- I used responsive web application methods and tools like React, Redux, Node.js, Express and other technologies during my time at the company
- Achievement Received recognition from the department head for outstanding work
- Developed a responsive web app using React, Redux, Node.js, and Express, integrating third-party APIs.

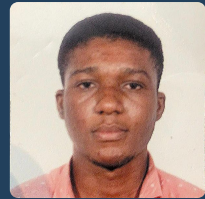

## PERSONAL PROJECTS

Flexicoins 01/2023 - 02/2023

Flexicoins is a cutting-edge web application that allows users to purchase USD, GBP, Bitcoin, and Ethereum with their local currency, while also earning interest as the value of their selected currency rises

- For this blockchain project, I utilized React, Firebase and paystack payment system to develop a robust and scalable application that seamlessly integrates blockchain technology with modern web development.
- I implemented Payment systems that allows users to purchase Cryptos, USD and GBP using their credit cards and mobile wallets.

## SKILLS

### Programing Languages

TypeScript · Javascript · Java · Python · SQL

### Frameworks and Tools

React.js · Next.js · React Native · Node.js · Express · MongoDB · Rest APIs · Git · Docker · Android Studio

## STRENGTH

### Learning

In this constantly changing software engineering world, new things keep being introduced and old things keep being forgotten. Learning keeps me not being oblivious from what people do today.

## ACHIEVEMENT

### I designed one of the first Crypto web apps in my country Ghana.

The crypto web application Flexicoins, had nearly 500 users with more than 15,000\$ in Revenue. This was a Success.

## LANGUAGES

English Native

French Intermediate

## INTERESTS

### Participating in Coding Challenges

### Video games and Movies

### I love playing Chess
