EDUCATION

Junia ISEN

Masters of Engineering in
Software Engineering

Lille, France 2023 - 2025

- Software Architecture and Clean Code
- Advanced Web Development
- Databases & Data Engineering
- Cloud Computing & Deployment

SKILLS

TypeScript · Java · Python · SQL ·

HTML · CSS

React · NextJS · Spring Boot · FastAPI ·

PostgreSQL · MySQL · MongoDB ·

Tailwind · Material UI

Docker · Postman · Grafana stack ·

Jenkins · TeamCity · Jira · Github ·

Podman · MCP Servers

EXPERIENCE

SHIFT

Shift Technology

Paris, France

Software Development Engineer in Test

03/2025 - Present

Permanent - Full time (CDI)

- Built automated test frameworks for frontend and backend flows, increasing regression coverage by 30% and reducing production defects
- Collaborated with 20+ engineers across 5 countries to deliver high-quality, scalable software
- Developed and maintained CI/CD pipelines for automated tests, improving deployment reliability and reducing rollback incidents.

STATION F (Kanop)

Paris, France

Frontend Engineer

03/2024 - 02/2025

Internship + Freelance

- Owned frontend development for Kanop's web platform using React and TypeScript, driving UI/UX improvements that directly supported product goals
- Integrated backend APIs provided by a senior engineer using React Query to fetch and manage data efficiently.
- Implemented unit and integration tests with Jest and React Testing Library, achieving 90%+ coverage.

PROJECTS

CrowdTest.dev

2025 - Present

Paris, France

Built a full-stack crowd testing platform for SaaS developers to catch real user bugs missed by automated tests.

- Developed frontend and backend entirely in Next.js, with PostgreSQL database hosted on Supabase
- Containerized the application using Docker and published the image to Docker Hub for reproducible deployments
- Set up CI/CD pipelines with Vercel: GitHub branch pushes trigger automated tests and deploys to corresponding environments (staging and production)
